Our Goal and Mission

Our Customers

Total Customer Satisfaction

Delivering high-quality and cost-effective software products on time using well-tested technologies
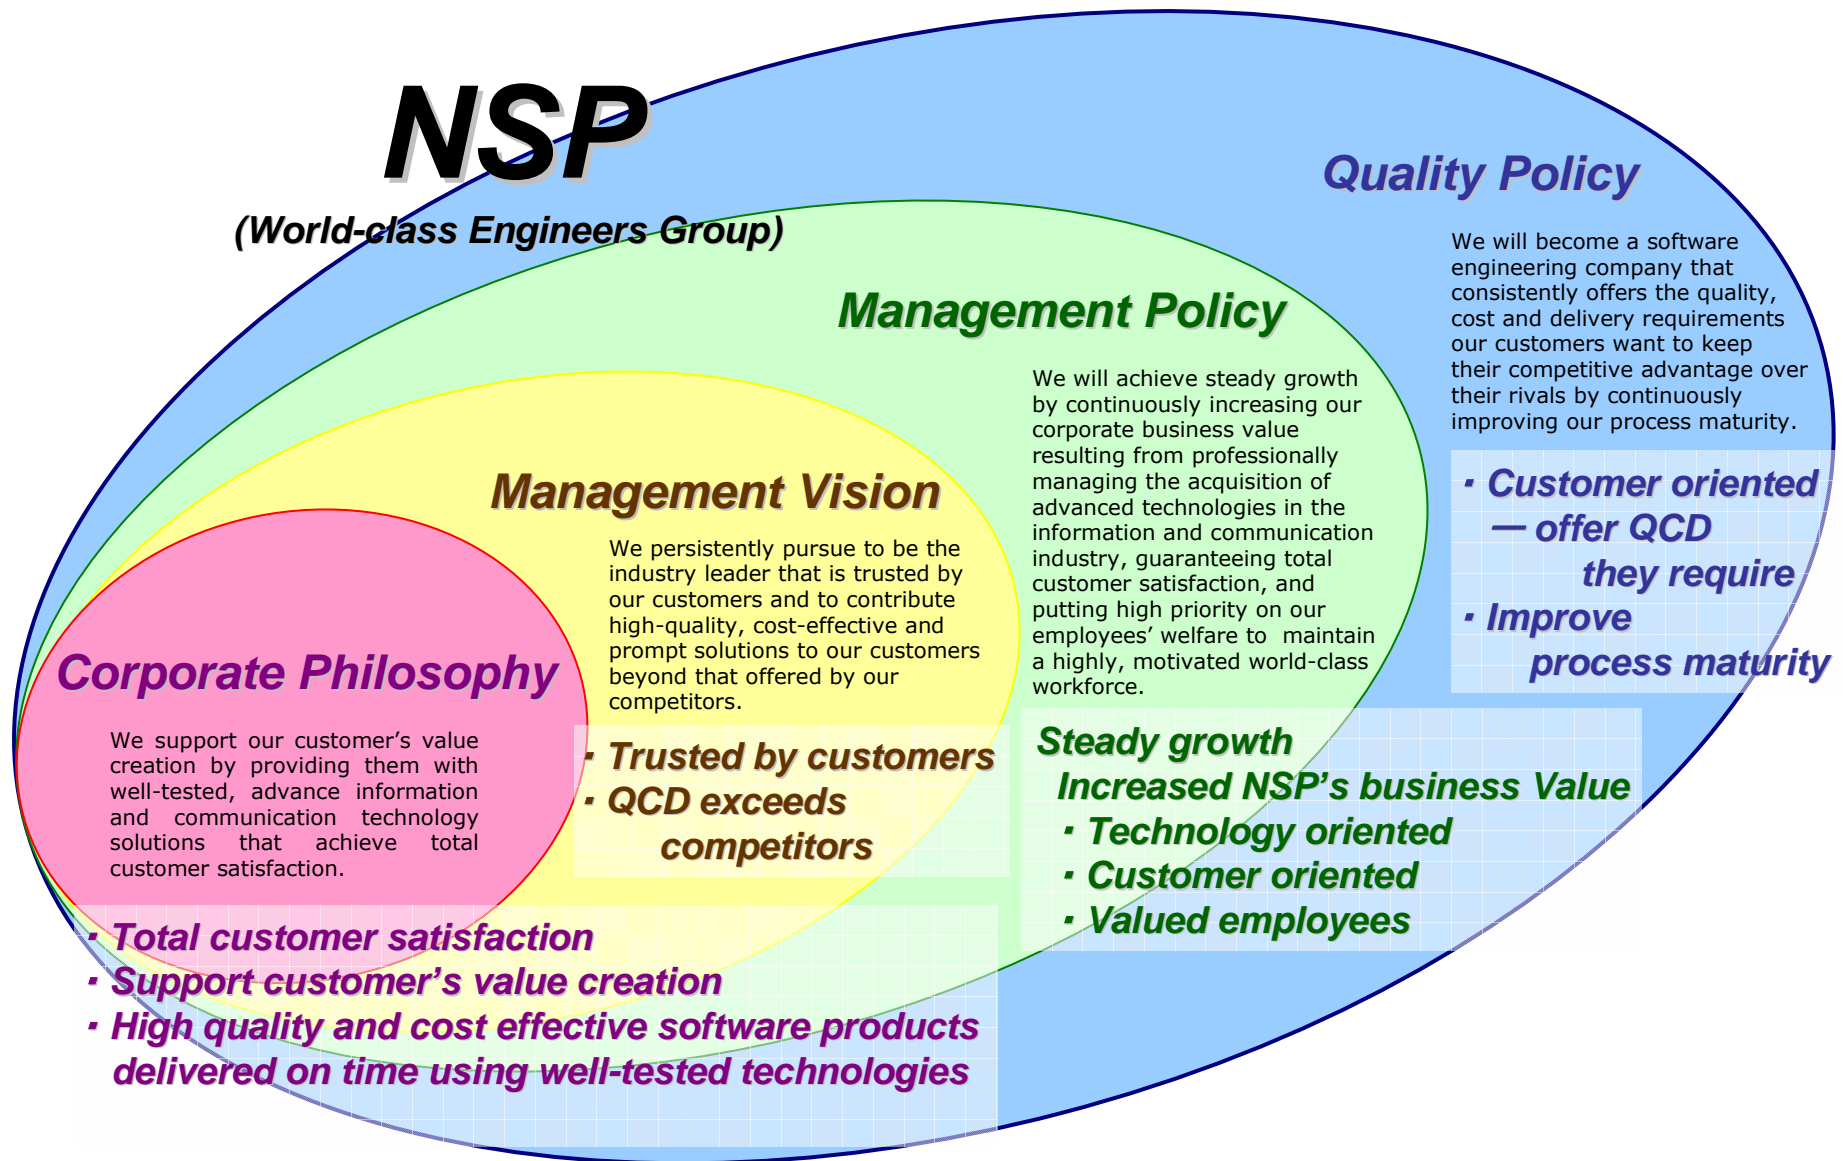

Based on

Corporate Philosophy

Management Vision

Management Policy

Quality Policy

NSP *(World-class Engineers Group)*

Overview of Corporate Vision

NSP
(World-class Engineers Group)

Corporate Philosophy

We support our customer's value creation by providing them with well-tested, advance information and communication technology solutions that achieve total customer satisfaction.

- **Total customer satisfaction**
- **Support customer's value creation**
- **High quality and cost effective software products delivered on time using well-tested technologies**

Management Vision

We persistently pursue to be the industry leader that is trusted by our customers and to contribute high-quality, cost-effective and prompt solutions to our customers beyond that offered by our competitors.

- **Trusted by customers**
- **QCD exceeds competitors**

Management Policy

We will achieve steady growth by continuously increasing our corporate business value resulting from professionally managing the acquisition of advanced technologies in the information and communication industry, guaranteeing total customer satisfaction, and putting high priority on our employees' welfare to maintain a highly, motivated world-class workforce.

Steady growth

Increased NSP's business Value
- **Technology oriented**
- **Customer oriented**
- **Valued employees**

Quality Policy

We will become a software engineering company that consistently offers the quality, cost and delivery requirements our customers want to keep their competitive advantage over their rivals by continuously improving our process maturity.

- **Customer oriented**
  — offer QCD they require
- **Improve process maturity**
